**Story Project Example: Planting a Garden**

**Problem**
You have an irregularly shaped area where you wish to plant a garden. It is recommended that you get rid of the grass and weeds before planting. You need to decide the following:

1. What method will you use to get rid of the weeds?
2. What materials, if any, will you need, and how much of them will you need?

**Task**
The numbers on the figure below represent lengths in meters. Explain what you need to know to solve the problem. Then create a photo or video story that presents and explains your solution process.
