SESSION 8: HANDOUT 1 (EXPLORE)

Utilizing Community Resources

Task
As a table group, brainstorm an instructional unit (consisting of three to five lessons) that integrates mathematics and science and incorporates aspects of implementing an effective outdoor learning experience (Session 3). Focus on reporting how local community resources can be used as an integral part of the instruction. Select a spokesperson to report out to the whole group.

Notes
General description of the instructional unit:

List the community resource(s) to be utilized:

General description of how the community resource(s) will be used to enhance the instructional unit:
